#### **Tesla Energy – East Granby, CT**

2019 – Present

Responsible for all Photovoltaic and Energy Storage System inspections in CT

My career in the electrical industry began as a teenager in the late 1970's as a graduate of Westfield Vocational High School in Westfield, MA, and my passion for the trade has not waned since. I enjoy working hands on, teaching others, learning from others, and inspecting.

We are living through trying and opportunistic times in the electrical industry. The NEC is constantly evolving at a rapid pace. Changes in general practices are improving safety, and new technologies, never imagined even 20 years ago, are now mainstream.

I believe that opportunities for electricians have never been better. Any help we can get to improve our knowledge base should be welcomed and embraced. I look forward to ending a long career by playing a small role in that process.
